 - ▀ Significant experience across IT areas
 - ▀ Nearshore hub in highly skilled Poland
 - ▀ Cost effective low risk service provision
-

Your close outsourcing partner for IT Services

Nearshore outsourcing

In a global market, working with your next-door neighbour still makes a lot of sense, and rock-bottom cheap is not as good as "value for money".

Wroclaw is located in south-western Poland, home to nearly 500,000 people, and to the top technical university of Poland.

A large number of foreign corporations, such as Siemens, HP, Volvo, Bosch, LG Electronics, SAP, Google, 3M and Whirlpool, have chosen to locate their subsidiaries or production sites in Wroclaw.

The local workforce shows exceptional technical skills and young people also often benefit from work experience in the UK, Ireland or Germany.

A EU member since 2004, Poland has the same culture, legal framework and in the same time zone as most EU countries.

Being close to business centres in Germany, France, the UK and Nordics, we can work alongside with your teams, on your premises.

Low risk, High value

Outsourcing is indeed taking a risk. Poeware knows that and will shoulder as much of it as possible. We will be ready for the commitment you wish and will partner with you from Day 1.

We work nearshore, which means that you can know exactly who the people of your project are. Our Buy a Team scheme will allow you to make offers to the consultants who work on your project.

Being so close, working from our premises is easy and affordable.

That's what nearshore outsourcing and consulting is all about. Great prices for developers you can pick, meet and have the chance to assess, to control, to reward even. Qualified staff that help you save money but provide you with value for money.

About us

Poeware was founded in 2004 by a group of international consultants in order to provide first class IT engineering to our natural market of Western Europe and Nordics.

Our team operates from our headquarters in

Wroclaw, and from our project offices in Munich and Madrid, while our customer base is well established in Germany, France, Spain, the UK and Poland, and extends as far as Argentina and Tahiti.
